CHRIS CLARK

Expert ERP and AI Program Leader | Strategy | Delivery |
Implementation | Common Sense Transformations | CIO | Oracle
Fusion | Available for Engagements*

Washington, District of Columbia, United States

Summary

I am a technology leader with 20+ years of IT strategy and operations experience.

Experience

Byrne, Inc.

ERP and AI Program Manager / Transformation Leader (Contract)
January 2021 - Present (5 years 6 months)

- Led strategic planning, vendor selection, and execution of Byrne Dairy's Business Systems Modernization Project, transforming legacy operations through enterprise-wide digital integration.
- Oversaw the implementation of Oracle Fusion Cloud ERP (25B) and Oracle Warehouse Management System (WMS) across finance, procurement, supply chain, inventory, demand/supply planning, and manufacturing.
- Chaired the bi-weekly executive Steering Committee, aligning cross-functional leadership (Finance, IT, HR, Operations, Strategy) on scope, vendor performance, change management, and risk mitigation.
- Managed a team of 100+ consultants and internal staff using a custom Earned Value Management (EVM) model to control cost and schedule.
- Used Smartsheet for agile delivery, including sprint planning, milestone tracking, and real-time collaboration across global teams.
- Facilitated process optimization workshops and aligned workflows to cost-justification models, ensuring measurable ROI and stakeholder buy-in.
- Consolidated and decommissioned 11 legacy systems; led multiple ETL data migration sub-projects to ensure clean cutover of historical data to Oracle ERP.
- Architected an enterprise integration layer using Oracle Integration Cloud (OIC) and RESTful APIs to connect Oracle Fusion Cloud with retained legacy systems.
- Developed a custom "single-pane-of-glass" dashboard using Oracle Visual Builder and OIC to monitor transaction health, flag exceptions, and improve transparency during cutover.

- Defined and executed the ERP program strategy, ensuring cross-functional alignment, accountability, and timely governance across project phases.
- Delivered Byrne's Oracle ERP Go Live in September 2024—on time and on budget—achieving a major transformation milestone through disciplined execution.

Maryland & Virginia Milk Producers Cooperative
 Cloud ERP Program Manager / CIO (Contract)
 January 2017 - January 2021 (4 years 1 month)
 Washington D.C. Metro Area

- Championed the enterprise-wide deployment of SAP S/4HANA Cloud (PE2502), transforming finance, supply chain, manufacturing and distribution operations with real-time data visibility.
- Defined and executed a three-year digital transformation roadmap, modernizing legacy infrastructure and preparing for scalable, M&A-ready growth.
- Led SAP Process Orchestration to decommission five legacy systems and integrate five external platforms (CRM, logistics, finance) using REST APIs, IDocs, and RFCs—streamlining data flow and boosting accuracy.
- Built intuitive, role-based SAP Fiori user interfaces with SAP Business Application Studio and OData services, improving user experience across devices.
- Championed business process redesign across departments, promoting standardization, transparency, and alignment between IT and business stakeholders.
- Developed custom ABAP workflows to extend SAP functionality while maintaining clean integration with core systems.
- Deployed and integrated UKG/UltiPro HRMS with SAP to streamline HR operations and improve workforce data alignment.
- Used Atlassian Jira for agile project tracking, sprint planning, issue resolution, and collaborative delivery across global teams.
- Rapidly implemented Microsoft 365 during COVID-19, enabling secure remote work and ensuring uninterrupted progress on all digital initiatives.
- Reorganized the IT function and launched a PMO (Program Management Office) to standardize execution, governance, and cross-functional project delivery.
- Led a high-performing team of 70+ internal and external professionals, fostering a culture of collaboration, accountability, and milestone ownership.
- Chaired the executive steering committee, overseeing budget, risk, stakeholder engagement, and strategic decision-making.

- Successfully led SAP Go Live in August 2021, completing the program on time and under budget—delivering enterprise transformation through strategic leadership and team excellence.

SCORE Association

Vice President of Technology (Contract)

January 2015 - January 2016 (1 year 1 month)

Herndon, VA

Developed IT strategy and technology governance plan and roadmap in response to SCORE's business objectives. Lead project teams in multiple concurrent high-impact IT projects. Provided stewardship, insight and guidance for organizational technology initiatives to ensure stakeholder satisfaction.

Key Achievements:

- Provided vision and leadership for CORE CRM technology that operates the business mission of SCORE.
- Built a collaborative Technology Task Force of executives, staff, volunteers and consultants to develop short (6-month) and long (24 months) digital strategies for SCORE.
- Oversaw a re-implementation of several Case Management System components including a streamlined DB architecture and improved reporting and client onboarding processes.
- Evaluated and implemented improvements in Enterprise Apps including CRM/Case Management/Fundraising (Blackbaud Raiser's Edge), DevOps (Linux/Amazon AWS), and Infrastructure (MS-365 cloud-based enterprise Win10).
- Optimized operations by leading a long-term approach to R&D, technologies initiatives and staff development after a comprehensive analysis of industry trends and best practices.
- Instituted an ITSM best practices process framework for RFP, app development, tech support, backup and disaster recovery.

NeighborWorks America

SVP, Information Management (Contract)

January 2013 - January 2015 (2 years 1 month)

Neighborworks America improves communities by providing opportunities for low and middle-income families to become homeowners. Supporting 170 affiliated non-profit housing agencies, Neighborworks is the leader in making the American Dream of homeownership a reality for those in need.

In 2013, I joined the team at NeighborWorks America. Within this role, I established a 3-Year Technology Roadmap and optimized IT operations for this national non-profit organization. Serving as a Security Expert, I improved reliability and security of all NeighborWorks technology and business assets by establishing organizational SIEM and leading remediation for PCI DSS compliance.

Key Achievements:

- Contributed to a Salesforce CRM/CMS implementation platform to serve 170 NW affiliate organizations and over 100,000 end user customers.
- Led the implementation of a custom based end-user training system that served as a mobile university managing over 400 classes and 10,000 students per year.
- Transitioned environment from on-premise servers to a hosted, cloud-based AWS data center.
- Re-aligned IT to utilize the ITIL framework, vastly improving departmental communication and effectiveness.
- Evaluated and prioritized the management and implementation schedule of an 80+ project technology portfolio.
- Instituted ITSM/PPM software, improving the repeatability, measurability and transparency of all project initiatives.
- Consulted in systems design and architecture, leveraging software development skills to provide new technology approaches to quickly resolve nagging, nasty technology challenges.
- Reduced software maintenance, development, communications and network infrastructure expenses by negotiating IT contract relationships with all service providers.

KaBOOM!

Director of Information Technology (Contract)

August 2011 - January 2013 (1 year 6 months)

Washington DC

As Director of Information Technology, I restructured the IT team to improve service levels and expand career opportunities while implementing strategic

processes that completely transformed all IT infrastructure and applications in 12 months. Also, I delivered significant cost savings by promoting and implementing best practices to minimize business disruption/down time in the area of Incident and Change management.

Key Achievements:

- Re-architected LAN and WAN instituting a new VPN that provided seamless access to data resources country-wide.
- Integrated new national Unified Communications System including Cloud-Based, VoIP telephony, Audio and Video Conferencing, E-Mail and VPN. (Polycom, Vidyo, Microsoft, iCore, AT&T).
- Reduced IT OPEX 15% by replacing old legacy systems of record with new SaaS-based systems of engagement.
- Led vendor evaluation and requirements analysis for new Cloud-Based ERP system.
- Migrated costly internal apps to new cloud platforms, reducing complexity, risk and maintenance costs.

Minestream Software Company
Chief Technology Officer (Start-Up)
2008 - 2011 (3 years)
Gaithersburg, MD

In 2008, I joined Minestream Software, leveraging my IT leadership experience to develop innovative IT strategy that delivered rapid growth and scalability while minimizing potential risk and costs. I employed dynamic management techniques and processes to manage global development and operations for an international team of software developers in the U.S. and offshore.

Key Achievements:

- Assessed client network security processes and procedures for internal networks.
- Recommended and implemented security strategies and technologies for activity monitoring and management.
- Led innovative design of stealthy "reverse-firewall" network devices that stopped information leaks at the network door and worked in tandem with SaaS-based dashboard.
- Architected an embedded technology product strategy and implementation plan for a suite of new internet safety devices.
- Oversaw security strategy consulting and integration teams in highest profile, multi-million dollar accounts.

- Developed international technology patent featuring 65 innovative claims that provided strategic advantage and an exit strategy in a highly competitive market.
- Built four consumer network security appliance products in a span of 24 months.
- Identified and cultivated strategic partnerships with network device manufacturers in the US, Israel and Taiwan that drove software performance, functionality and value.
- Represented technology team in management meetings, influencing executive management team decisions regarding hardware, software, training, IT policies and guidelines for systems support and operations.

Pizza.com

Chief Technology Officer (Start-Up)

2006 - 2008 (2 years)

Bethesda, MD

I spearheaded the development of a web startup Pizza.Com, an online portal for all things Pizza. I held full responsibility for the delivery of industry-leading advertising and technology strategy that positioned the business as the primary internet pizza search engine.

Successfully marketed and sold business concept in a multi-million dollar deal with an NYC advertising firm.

Key Achievements:

- Strengthened the business market position and visibility by creating targeted digital content and Google sponsored ads.
- Maintained top 10 Google search status for pizza search for 18 straight months.
- Built and managed an action-oriented team of developers, information architects, and advertising experts.
- Increased revenues 15% per month for 18 straight months.
- Negotiated private transaction that resulted in a 200% return on investment for employees and investors.
- Developed technology and business strategy for sustainable business growth.
- Managed portal web operations for the high-volume website including site architecture, development, and outsourced service management.

Iconixx

Vice President and Chief Strategy Officer

2000 - 2002 (2 years)

Bethesda, MD

Provided technical oversight for corporate acquisitions and strategic accounts for \$85MM Global Systems Integrator. Lead a 25-person team in software integration for strategic accounts. Developed an integration and reorganization strategy to support five corporate acquisitions. Performed P&L analysis, technology due diligence, technology strategy evaluations, and venture capital relationships and collaboration. Served as thought leader and tactical execution consultant on all aspects of strategy, platform selection, and configuration to meet business objectives.

Internet Information Services Inc.

President and CEO

1994 - 2000 (6 years)

Bethesda, Maryland, United States

Started an Internet Consulting Firm from my basement that grew to 100 professionals and over \$20 million in revenue. Sold in 2000 to Iconix. Major clients included Verizon, GEICO, T. Rowe Price and Time Warner. Did everything from architect solutions to conduct sales to manage every aspect of the business including the acquisition. I was young and impressionable. This was one of the greatest experiences of my life.

Computer Associates

Software Architect

June 1989 - August 1991 (2 years 3 months)

Designed and developed security application components for DAC's flagship SNMP based Network Management System (eventually purchased by Computer Associates). Also worked as a contract software engineer at Sun Microsystems and Amdahl in Mountain View, CA developing components of the SunOS and Amdahl UTS operating systems.

DXC Technology

Sr. Software Engineer

April 1988 - May 1989 (1 year 2 months)

Designed, developed and debugged software components for TTMS (telemarketing software) under contract to NPRI and AT&T. Ported software written in C and Fortran from VAX/VMS to AT&T 3B2/Tuxedo environment. Developed a library interface for Tuxedo that implemented VMS/RMS indexed filed system functionality.

Education

American University

Bachelor of Science, Computer Systems Applications/Technology
Management

Earl L. Vandermeulen High School
